

January 27, 2022

To the person in charge of REACH regulation rules at your company,

The European Chemical Agency (ECHA) publishes and updates a list called "Candidate list of SVHC (Substances of Very High Concern), meaning that they are susceptible to be submitted later on to an authorization procedure in order to be used.

The REACH regulation imposes to all companies selling articles containing more than 0.1% of one or several substances of this list to declare them to their customers.

At this very date, all foam rubbers commercialized by Interep, please see list below (1), do not contain any substance to be declared according to REACH regulation.

(Source: list of SVHC Substances of Very High Concern, published by REACH in January 2022).

Please know, that we remain at your service for any information you may need. You may contact directly the laboratory at :
