

Ear Clips

Cr6-free surface treatment
in compliance with RoHS.

Rounded band edges
which prevent cutting
or damage to the hose.

All clips and clamps are
marked with the clamping
range and the Mikalor logo.

Easy and quick to mount.

Wide variety of models
which cover many
applications.

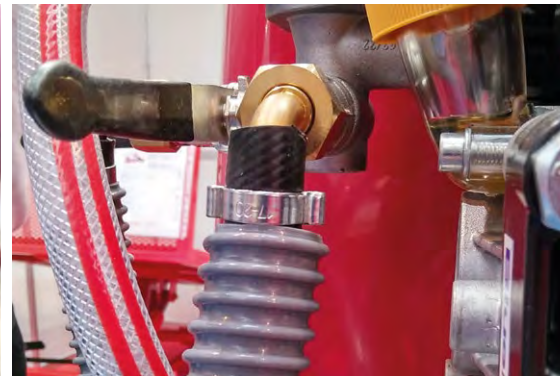

The most practical solution for small-diameter applications

Ear clips are a practical solution for small-bore hoses which are easy to mount.

Models with one or two ears can be installed using a simple pair of pliers and guarantee a safe, durable and tamper proof assembly.

When clamping soft-wall hose, the models with inner-ring can be used in order to protect the hose from being pinched during assembly.

Ear clamps are widely used in hydraulics and pneumatics, and are also very common in the agriculture sector.

One Ear

From Ø 7mm to Ø 20mm

Two Ears

From Ø 5mm to Ø 46mm

One Ear with Inner-Ring

From Ø 7mm to Ø 19mm
