

We hereby declare that the hose

913042.....00 **VACUPRESSFOOD**

is made on thermoplastic rubber with embedded galvanized steel spiral with polyester yarn reinforcement

Smooth inner and outer surfaces.

Operating temperature -25°C to + 80°C.

Avoid contact of food with the heads and outer surface of the tube.

The hoses must be sterilised prior to use.

**In compliance**

**with the following U.S.A. legislation:**

- FDA - code of Federal Regulation Title 21 part. § 177.2600 (Rubber articles intended for repeated use) par "e" (aqueous food)

The items mentioned above were manufactured exclusively with substances (monomers, pigments and additives) indicated in the positive lists of the above legislation.

The simulant and test conditions are chosen according to FDA CFR 21 § 177.2600 par "e" (aqueous food)

In accordance with test report or/and theoretical evaluation, the substances used are confirm with the FDA 21 CFR § 177.2600 par "e" (aqueous food).

The user of the hose intended for contact with food is responsible for informing the company in writing of any restrictions due to the characteristics of the ingredients (presence of additives and flavourings) of the food product to be transported.

This declaration will be updated in the event of changes in formulation of the material or if the legislative references are modified and updated so as to require a new check for compliance.
